FIVE YEAR INDEX

1973 - 1969

Plant Engineering/Barrington, Illinois 60010

How To Use Your Five-Year Index

PLANT ENGINEERING'S Information Retrieval System is based on a four-digit code scheme. The first two digits—from 05 to 95—are primary classifications as shown on the facing page. There are 19 primary classifications covering subjects of direct interest to plant engineers.

On the following two pages, each of the 19 primary classifications are subdivided into secondary code classifications identified by two additional digits. (These four-digit code numbers will be found at the inside bottom edge of every feature article page published in PLANT ENGINEERING.) Following the four-digit listing, you will find an alphabetical listing by subject showing the four-digit code number and page number in the index.

Information can be retrieved in a number of ways. For example, let's say that you are considering a new construction project and want to review all PLANT ENGINEERING-published material on this subject. In the two-digit listing on the facing page, note that "5000—Construction" starts on page 12. To obtain specific problem-solving information, you may use either the four-digit listings or the alphabetical index. Assume the problem is a leaking roof. In the four-digit listing under "Construction," you will find the secondary classification "5015—Roof Decks and Roofing" and a reference to page 13. In the alphabetical index, the information will be found under "Roof Decks and Roofing-5015" page 13.

If you are searching for a specific article but can remember only the author's name or the company, refer to the alphabetical listings of Authors and Companies arranged by years on the back pages.

IMPORTANT NOTICE –

Reader Service Information

PLANT ENGINEERING will continue its policy of honoring requests for complimentary copies of feature articles from *current issues.* These may be requested by circling the number found at the end of the article on the reader service card. These cards are valid for 60 days from issue date. *Articles appearing in issues over 60 days* old may be ordered at a cost of 25 cents per article to cover the cost of retrieval and handling service. These copies may be in the form of tear sheets, reprints, or Xerox copies, depending upon available supply. Be sure to identify each article requested by title, issue date, and page number, or make a copy of the index page and circle the articles desired. Send your request along with a check to: Editorial Reprint Department, PLANT ENGINEERING, 1301 South Grove Avenue, Barrington, IL 60010.
